What we'll cover:

The Constituent Record : **How to create and edit Constituent records, enter both types of constituents, learn how to best manage household records, and learn how to search, manage and merge duplicate records.**

Creating a Constituent Record in LGL

2 Types of Constituent Records in LGL

Individual record

Can represent a single person, a couple or even a household.

Only field required to be populated is the "Last name" field

Organization record

Use this for businesses, vendors, foundations, etc.

Only field that must be populated is the name of the organization.

It is possible to capture a Contact name at the organization.

Constituent record Settings:

- **Add Prefix & suffix field**
- **Set Addressee & Salutation preferences**

Managing Household Data
Managing Households - 2 approaches

Simple Approach

Use one record for a couple or a family

Benefit: simplifies donation tracking and mailings

Limitations: Unable to add categories to individuals; can't sync more than one email address

https://help.littlegreenlight.com/article/77-managing-households-in-lgl

Advanced Approach

Use multiple records tied with relationships for each person in the family

Benefit: More detailed data can be collected, each record can be sent emails

Limitations: None, but requires more careful management

https://help.littlegreenlight.com/article/78-creating-relationships-between-constituents

Example: Use one record to record a household

What we'll cover:

Using Constituent Records : **How to manage and use Constituent categories, including bulk editing them, how to create lists and perform simple and advanced Constituent Searches.**

Constituent Categories

What are <u>Constituent Categories</u>?

Constituent Categories

- Constituent categories make it possible to segment, or code, your constituents in different ways.
- They are the best way to keep your constituents organized and to facilitate the creation of targeted lists, reports, and mailings.

Examples: Groups, Communication tags, Capacity, etc.

Can I customize Constituent Categories or add new ones?

YES - within the Menu Items area in the Settings tab!

- LGL comes with some default categories that can be customized (**Examples:** Groups, Communication tags, Capacity, etc.)

- It is also possible to create as many new Custom Categories as you wish (Examples: Volunteer interests, Referral source, etc.)

Creating Constituent Lists with List Manager

Lists: 2 Options

Static List

Represents data at a specific point in time

This is useful when you want to compare info from one point in time to another
(i.e. compare email address growth from 2021 to 2022)

Dynamic List

List of constituents that automatically updates as search criteria is met

This is useful when you want up-to-the-minute data with a single click
(i.e Lapsed donors who gave $500 or more in a single gift)
